Position Description: The Department of Grain Science and Industry and the IGP Institute is seeking applications for a non-tenure track, 12-month appointment, annually renewable position at the instructor level serving as a Flour Milling and Grain Processing Curriculum Manager. The extension/outreach component through the IGP Institute (IGP; http://www.ksu.edu/igp) will include development and presentation of workshops, courses, distance education courses, and other technical outreach programs to enhance the market promotion, consumption and utilization of U.S. cereal grains, oilseeds and their value-added products for the global grain and feed industry.

This position will be responsible for the flour milling and grain processing programs and report to the IGP Institute director.

Activities include, but are not limited, to the following:

- design and implementation of educational programs domestically and internationally;
- provide technical assistance in milling to existing and potential international users of US wheat;
- provide technical information on wheat milling performance and mill operations to international trade teams and individuals visiting the IGP Institute;
- represent the IGP Institute related to topics such as utilization of U.S. wheat, technical milling and flour quality;
- participate in domestic and international wheat-related activities and conferences as requested;
- identify opportunities for research based on observations while in the field
- conduct meaningful collaborations with member of the Grain Science and Industry department related to teaching, research and outreach; and
- perform other duties as assigned.

Minimum requirements: Applicants should have a B.S. in milling science, cereal science, process engineering, or a related discipline with a minimum of five years of direct experience in the flour milling or grain processing industry including technical milling, production or operations experience, maintenance supervision, and/or project management. Demonstrated ability to teach industry professionals are a must. Demonstrated people and public speaking skills. Excellent oral and written communication skills. Appreciation and experience interacting with international audiences and foreign cultures. Ability to speak English clearly and to work in a multi-cultural setting. Strong commitment to fostering and expanding diversity and collegiality.

Preferred Qualifications: International industry-related work experience, knowledge and expertise working in flour milling and grain processing; conversant in multiple languages; master’s degree in milling science, cereal science, process engineering or related field.

Salary will be commensurate with experience and qualifications. Employment and health benefits will be in accordance with those offered to Kansas State University unclassified employees.

Interested candidates should send a letter of interest with background and experience, a resume, and list of three references with the current contact information (name, title, affiliation, and phone and email information). The candidate is requested to also submit a sample of education materials (teaching, extension, in-classroom, distance education) prepared by the individual. Screening of applicants will begin March 23, 2016 and continue until the position is filled.

Application materials may be sent to the Department of Grain Science & Industry, Attention Flour Milling and Grain Processing Curriculum Manager, 201 Shellenberger Hall, Manhattan KS 66506 or submitted online through Kansas State University’s job portal. For information on the IGP Institute and this position visit grains@ksu.edu/igp.
