PART- I Academics

Academic Record

BS. National Institute of Technology (NIT), Surathkal, India. *1988*
Chemical Engineering

MS. Indian Institute of Technology (IIT), New Delhi, India. *1990*
Biochemical Engineering and Biotechnology

Thesis Title: *Studies on immobilized Lactobacillus bulgaricus*

Ph.D Indian Institute of Technology (IIT), New Delhi, India. *1995*
Biochemical Engineering and Biotechnology

Dissertation Title: *Operational characteristics of upflow anaerobic sludge blanket reactor during and after start-up*

MBA Kansas State University, Manhattan, USA *2009*

♦ Academic Achievements

Class Work

GPA in courses taken during MS degree 3.8 on 4.0
GPA in courses taken during BS degree 3.9 on 4.0
GPA in courses taken during MBA degree 4.0 on 4.0

Academic Awards

- Indian Institute of Chemical Engineers Award for getting the highest grade in V, VI and VII semesters in Chemical Engineering. National Institute of Technology, Surathkal, India, 1987

- Dinesh Rao Memorial Award for getting the highest grade in Chemical Engineering (I to VIII semesters). National Institute of Technology, Surathkal, India, 1988.
- University First Rank in Chemical Engineering, Mangalore University, 1989
- Dean's Scholar for academic excellence in MBA, Kansas State University, 2009
- Gary and Betty Lortscher Endowed Professorship, 2012
- ASABE Superior Paper Award, 2013

PART- II Experience

Academic Experience

Gary and Betty Lortscher Associate Professor in Renewable Energy, Department of Grain Science and Industry, Kansas State University, Manhattan, KS, *07/12 – present*

Department of Chemical Engineering (ancillary appointment), Kansas State University, Manhattan, KS, *01/2014 - present*

Assistant Professor, Department of Grain Science and Industry, Kansas State University, Manhattan, KS, *02/07 – 06/12*

Accomplishments

- Established a fully functional bioprocessing and renewable energy lab and have enabled productive research programs in biofuels, biochemicals and specialty products
- Secured $3,130,746 as PI in research funding; directly involved in projects worth $ 15 million in research funding since 2007. Developed collaborative relationships with faculty in 6 departments and 3 colleges at K-State and with faculty at 3 universities, and with researchers at 4 different industries
- Designed and developed two new courses: GRSC 745 Fundamentals of Bioprocessing (Even Spring Semester): CHE 715: Biochemical Engineering (Odd Spring Semester) and GRSC 905 Enzymes and Bioprocessing Applications (Fall Semester); taught GRSC 630 Management Application in Grain Processing Industries. Average TEVAL score for GRSC 745 (overall effectiveness of teacher): 4.5; GRSC 905: 4.5; GRSC 630: 4.0
- Member of 2 committees at University level, 2 committee at College level, and 7 committees at Department level; Faculty Advisor: Alpha Mu club and Product Development; Co-chair: Undergraduate Research Committee; Swanson Reading Room Committee; Feed Safety Research Center. External reviewer for proposals and journal manuscripts; Served as Subject Editor for two journals; Delivered invited lectures. Volunteered time for public service activities at Department, College and University level. Center for Sustainable Energy, NSF IGERT and NSF REU Faculty in Campus

Current Research Projects

1. Novel Process of Biomass Conversion to Butylenes.$500,000. US DOD Navy SBIR Phase II. 2012-2015, Lead PI: Technology Holdings. Kansas State University Subcontract ($210,200)
2. Sustainable and Technically Advanced Integrated Biobased and Bioenergy Products Project. $2,941,740. Kansas Alliance for Biorefining and Bioenergy (KABB), Kansas Bioscience Authority (KBA). 2012-2014. Lead PI: MGPI,KSU subcontract ($698,296): PIs Madl R, Shi Y-C, Vadlani PV($381,256)
3. Plant based Sesquiterpene Biofuels. Lead PI: Chromatin Inc. DOE ARPA-E Program. KSU subcontract ($549,500). 2012-2016. PI Vadlani PV
4. Bioconversion of Paper Mill Waste to Value-added chemicals. $160,000. Consortium for Plant Biotechnology Research, Department of Energy (DOE). 2011-2013, PI Vadlani PV
5. Lignocellulosic Biomass Conversion to Infrastructure Compatible Fuels, Chemicals and Power. $ 5.7 Million. DOE-USDA Biomass Research Development Initiative 2012 – 2015. Lead PI Ceramatec Inc. KSU subcontract PI Vadlani PV ($650,000)
6. Production of Advanced Biofuels From Salinity Tolerant Brown Midrib (bmt) Sorghum Genotypes. $65,000. US Agency for International Development, 2013-2015 Kansas State University Subcontract ($44,000). PI Vadlani PV

Visiting Faculty, Department of Chemistry, Sri Sathya Sai Institute for Higher Learning, Puttaparthi, Andhra Pradesh, India, *06/08 – Present; <u>Sabbatical in Fall 2014</u>*

Invited Lectures, Department of Bioengineering and Chemical Engineering, Rice University, Houston, TX, 04*/03 – 04/08.*

Visiting Faculty, Department of Chemical and Materials Engineering, University of Auckland, New Zealand, *06/98 – 12/98.*

Adjunct Faculty, Department of Biotechnology, Anna University, Chennai, India, *08/95 – 05/97*

Accomplishments

- Compiled and taught a course Engineering Biotechnology and Bioprocess Engineering at undergraduate and graduate level.
- Taught Heat & Mass Transfer Laboratory course for sophomore chemical engineering students.
- Advised undergraduate and graduate research and was the internal examiner for a MS thesis

Research Scientist, Biomass Pilot Plant, Chemical Engineering Department, Texas A&M University**,** College Station, Texas, *1998-2002*
Mentor: Dr. Mark T. Holtzapple

Accomplishments

- Involved in pilot plant research and development process for bioconversion of paper fines to useful chemicals.
- Supervised research work of undergraduate and graduate students at the plant and investigated the performance of the various bioprocessing strategies.
- Designed and developed various process equipment and wrote safety reports for the plant
- Made presentations to funding agencies and involved in new product development.

Research Fellow (Government of Malaysia Fellowship), Institute for Post-graduate Studies & Research, University of Malaya, Kuala Lumpur, Malaysia, *08/97 – 05/98*
Mentor: Dr. Shaliza B. Ibrahim

Accomplishments

- Performed research on mixing and hydrodynamic studies in laboratory rigs and fermenters and advised graduate research.
- Participated in the project for producing 2, 3-butanediol from sugarcane molasses.

Industrial Experience

Principal Research Scientist, AgRenew Inc, Manhattan, Kansas 2002 - 2007

Accomplishments

- Process and product development of challenging, commercially-viable industrial biotechnologies using renewable resources.
- Identify emerging technologies of commercial interest and develop collaborative teams with universities and other established industries for synergistic relationships.
- Write proposals to state, federal and private funding agencies and be the Project Director for the awarded projects.
- Develop and sustain state-of-the-art laboratory facilities and supervise the smooth execution of in-house and sponsored research projects.

Research Officer, SPIC Pharmaceuticals Division (SPIC group of industries is a major industrial conglomerate in India), Chennai, India, *1995-1997*

Accomplishments

- Overall in-charge for the R&D fermentation division consisting of fermenters, product recovery unit and analytical equipments. Supervised four research assistants
- Provided leadership to investigate innovative bioprocess strategies and low-cost raw materials for maximizing penicillin G and V production (Pharmaceuticals).
- Attended supervisory development program at SPIC Management Center.

PART- III Affiliations/Service Activities

Senior Member, American Institute of Chemical Engineers.	2000 – present
Senior Member, Society of Biological Engineers	2005 - present
Life Member, Indian Institute of Chemical Engineers	1993 – present
Member, Phi Kappa Phi, an Academic Honor Society	2006 - present
Member, Sigma Xi, the Scientific Research Society	2007 - present
Moderator, AACC International Annual Meeting	2007, 2008
Honorary Director, Prathista Group of Industries, Hyderabad, India	2009 - 2011
External Reviewer, Biotechnology Progress, Biotechnology & Bioengineering, Bioresource Technology, Cereal Chemistry	2003 - present
External Examiner, Ph.D Thesis, University of Auckland, New Zealand; Indian Institute of Technology, Guwahati, India	2006-present
MS, PhD Theses, University of Malaya, Kuala Lumpur, Malaysia	2008-present
Student Advisor, Aggie Cricket Club, Texas A&M University	2001 - 2002.
Editor, Board for Student Publications, Indian Institute of Technology, New Delhi, India.	1991 – 1992

Panel Member:

- USDA CAP (Co-ordinated Agriculture Program) Phase I and II Panel. January and March 2011; June and July 2013.
- SBIR Biofuels and Biobased Products Peer Review Panel of Competitive Programs, Cooperative State Research, Education, and Extension Service (CSREES), USDA. 2007-08, 2008-09
- Symposium on Sustainability of Biofuels Production and Processing in the Central Plains, KSU. September 15-16, 2008;
- Symposium on Biofuels, MAPS Program, Kansas State University, July 2010, 2011.

Subject Co-Editor: Chemical Engineering Research and Design, Special Issue: Biorefinery Integration; Food and Bioproducts Processing, Special Issue: Biorefinery Innovations. 2009.

Guest Editor: Enzyme Research Journal, Special Issue: Enzymes for Biofuel Industry. 2010

Co-PI for Kansas State University: S1041: The Science and Engineering for a Biobased Industry and Economy

Institutional Service

University

Member, International Activities Committee, 2008 – present
Member, Faculty Senate University Handbook and Policy Committee, 2008 – present
Member, Selection Committee –University Distinguished Faculty Award for Mentoring UG Students in Research, 2010, 2011
Member, Selection Committee – University Award for Distinguished UG Student in Research, 2010, 2011
Member, Search Committee – AG*IDEA Project Co-ordinator. 2011
Member, Search Committee – Coordinator for New Faculty Institute. 2010.

College

Member, Undergraduate Research Committee, 2013 – present
Member, Diversity Committee, 2008 – present
Member, Scholarship Committee; College Committee on Planning, 2007-08.
Invitee, College of Agriculture Academic Standards Committee , 2011

Department

Chair, Swanson Resource Room Sub-Committee, 2011 – present
Chair, Feed Safety Research Center Sub-Committee, 2013-present
Co-chair, Undergraduate Research Committee, 2012 - present
Member, Search and Screening Committee – Department Head, Department of Grain Science and Industry. 2014
Member, Graduate Curriculum Committee; CSREES Initial Review Team, 2007-08
Member, Department Committee on Planning (DCOP), 2013 - present
Member, Distinguished Lecture Series Selection Committee, 2012 – present
Member, Search and Screening Committee – Tenure-Track Assistant Professor, Feed Technology and Safety. 2011
Member, Search and Screening Committee – Accounting Specialist, Department of Grain Science and Industry. 2011
Member, Graduate Program Committee, 2008 – present
Member, Research Program Committee, 2008 – present
Facilities Co-ordinator, Bioprocessing and Industrial Value-Added Program (BIVAP), 2012 - present

Faculty Advisor, Alpha Mu. Grain Science and Industry Students Honor Society. 2011 - present
Faculty Advisor, Student Product Development Contest for AACCI, 2008- present. Student team was placed Third in the Contest in 2008; and Second in 2012.

PART- IV Publications/Presentations/Invited Talks

Peer-Reviewed Publications

1. Zhang Y, Vadlani PV (2015) Lactic acid production from biomass-derived sugars via co-fermentation of Lactobacillus brevis and Lactobacillus plantarum. Journal of Bioscience and Bioengineering (accepted)
2. Probst KV, Schulte L, Durrett T, Rezac M, Vadlani PV (2015) Oleaginous yeast: a value-added platform for renewable oils. Critical Reviews in Biotechnology (minor revision)
3. Chen L, Vadlani PV, Madl RL, Wang W and Shi YC (2015) The investigation of virginiamycin-added fungal fermentation on the size and immunoreativity of heat-sensitive soy protein. International Journal of Polymer Science. Special Issue: Food Polymers Functionality and Applications (minor revision)
4. Guragain YN, Alvaro IH, Vadlani PV, Prakash O (2014) Lignins of bioenergy Crops: a review. Natural Product Communications 10(1), 201-208

Poster Presentations

1. Guragain YN, Vinutha KS, Kumar GSA, Barrios R, Prasad PVV, Rao PS, Vadlani PV. Evaluation of sorghum and its mutants for efficient grain and biofuels production, Research and state, Kansas State University, Kansas, October 28, 2014 – Won first prize, and selected to represent Kansas State University in Capital Graduate Research Summit at Topeka, Kansas in February, 2015.
2. DeMarco. R, Guragain YN, Vadlani PV. Evaluation of Alkali and Acid Biomass Pretreatments for the Production of 2, 3-Butanediol. Research Experience for Undergraduates (REU) Poster Session, Kansas State University, August, 1, 2014
3. Guragain YN, Vadlani PV. Evaluation of organic solvents for biomass pretreatment to produce 2, 3-butanediol. Bioenergy Symposium -2013, Kansas State University, April 11, 2014.
4. Zhang Y, Vadlani PV. D-lactic acid production from corn stover using engineered Lactobacillus plantarumNCIMB 8826. K-State REU Joint poster section. Manhattan, KS. Aug. 1, 2014.
5. Yanguang L, Bastola KP, Vadlani PV. Extraction of value added chemicals from biorefinery residues. KSU Research Forum, October 28, 2014.
6. Badiya PK, Thota SP, Yerram S, Rao N, Vadlani PV, Ramamurthy, SS. Cellulolytic enzyme production by endophytic fungi from Aegle marmelos plant using solid state

and submerged fermentation. Bioprocessing India 2014, ICT Mumbai, December 17-20th, 2014

7. Guragain YN, Wilson J, Staggenborg S, McKinney L, Wang D, Vadlani., Assessment of pelleting for partial deconstruction of forages To improve cellulosic ethanol production, Bioenergy Symposium -2013, Kansas State University, April, 11, 2013 won the best poster award at the symposium)
8. Probst, KV and Vadlani, PV. Fed-batch fermentation for increased single cell oil production from Lipomyces starkeyi. Kansas State University Bioenergy Symposium: Update on K-State research and educational programs related to sustainable bioenergy resource development and utilization in the central great plains. Manhattan, KS. April 11th, 2013
9. Zhang Y*, Vadlani PV, Biosynthesis of D (-) lactic acid from renewable paper waste. Annual Meeting, Society of Industrial Microbiologists (SIM), August 13-17th, 2012
10. Theerarattananoon K, Xu F, Wilson J, Ballard R, McKinney L, Staggenborg S, Vadlani PV, Pei ZJ, Wang D. Physical properties of pellets made from sorghum stalk, corn stover, wheat straw, and big bluestem. New Frontiers in Bioenergy. ASABE Annual Meeting, Louisville, Kentucky, August 7-11, 2011.
11. Probst KV, Vadlani PV. Optimization of process and media parameters for single-cell oil biosynthesis using Lipomyces starkeyi. Bioenergy Symposium: Mapping sustainable bioenergy opportunities in the central great plains-feedstocks, land use, markets, and socio-economic aspects. Manhattan, KS. April 27-28, 2011.
12. Chen L, Vadlani PV. Nutritional enhancement of soybean meal and hull for animal feed using microbial cultures. Kansas Soybean Expo, Topeka, KS, Jan 12th, 2011.
13. Zhang Y, Kumar A, Vadlani PV, Narayanan S, Cyanophycin Biosynthesis from Sorghum-Derived Sugars and Recombinant Escherichia coli. AACC International Annual Meeting, October 24-27, 2010. Savannah, Georgia
14. Bansal S, Zhang Y, Vadlani PV, Biomass-Based Integrated Biorefinery: Biochemicals and Lignin Composites Manufacturing. ASME 2010 International Manufacturing Science and Engineering Conference, Erie, PA, October 12-15, 2010.
15. Yoo J, Alavi S, Vadlani PV, Amanor- Boadu V, Thermo-mechanical Extrusion Processing as a Pretreatment for Efficient Ethanol Production from Soybean Hulls, K-State Center for Sustainable Energy, Kansas State University, KS. May 6, 2010.
16. Chen L, Vadlani PV, Madl R. Nutritional Enhancement of Soybean Carbohydrates and Hulls forAnimal Feed Using Microbial Cultures. Kansas Soybean Expo, Topeka, KS, Jan 6th, 2010
17. Brijwani K, Vadlani PV. Improved Ethanol Production from Cellulosic Biomass: Enhanced Enzyme Production from Agro-Industrial Residues using Solid State Fermentation. Center for Sustainable Energy, Kansas State University, Manhattan, KS May 2010.
18. Ananda NS, Vadlani PV, Madl R, Production of carotenoid-enriched animal feed by secondary fermentation of whole stillage. Recent Advances in Fermentation Technology (RAFT) VIII, San Diego, November 8 - 11, 2009
19. Zhang Y, Kumar A, Vadlani PV, Narayanan S, Production of platform chemical from

ethanol industry byproduct: cyanophycin biosynthesis using metabolically engineered Escherichia coli BL21. Advances in Fermentation Technology (RAFT) VIII, San Diego, November 8 - 11, 2009

20. Zhang Y, Kumar A, Vadlani PV, Narayanan S Cyanophycin biosynthesis using engineered Escherichia Coli BL21 and thin stillage from ethanol industry. 32nd Symposium on Biotechnology for Fuels and Chemicals, Clearwater Beach, FL, April 19-22, 2010
21. Ananda NS, Vadlani PV Production of carotenoid-enriched whole stillage and wheat bran by fermentation using Phaffia rhodozyma and Sporobolomyces roseus Society for Industrial Microbiology (SIM) Annual Meeting, Toronto, Canada, July 26-30, 2009
22. Vadlani PV, Value-added Chemicals from Paper Mill (PM) Sludge. Bioenergy and Environment, Consortium of Plant Biotechnology Symposium, Washingtion DC, February 9-11, 2009
23. Brijwani K, Vadlani PV, Oberoi HS, Coon E, Bioethanol Production from Wheat Straw: Enzymatic Digestion and Co-Culture Fermentation using Saccharomyces cerevisiae and Pachysolen tannophilus, Symposium on the Sustainability of Biofuels Production and Processing in the Central Plains, Manhattan, KS, September 15-16, 2008
24. Oberoi HS, Vadlani PV, Brijwani K, Coon E, Cellulase and Xylanase Production Studies: Solid State Fermentation using Wheat Straw and Bran as Substrates and Aspergillus oryzae and Trichoderma reesei cultures, Symposium on the Sustainability of Biofuels Production and Processing in the Central Plains, Manhattan, KS, September 15-16, 2008.
25. Prasad PVV, Vadlani PV, Anand KN, Madl RL, Carbohydrate and Ethanol Production Efficiency of Grain Sorghum, American Society of Agronomy (ASA) Joint Annual Meeting, Houston, TX, October 5-9, 2008.
26. Vadlani PV, Ramachandran KB, Hydrodynamics studies in UASB reactor, International Conference on Mixing, Tioman Island, Malaysia, April 1998

Invited Speaker

1. Value-added products from lignocellulosic wastes: D Lactic acid biosynthesis. CPBR symposium, Washington DC, March 3-4th, 2015
2. Renewable Biofuels: Technology and Sustainability. College of Business Adminstration, Kansas State University, February 25th, 2015
3. Biofuels from Biomass: Energy, Technology and Society. MBA Triple Bottom Line Business Ethics Education Initiative, Kansas State University, April 23rd, 2014
4. Toward a Sustainable Bioeconomy: Carbohydrates to Hydrocarbons, Department of Chemistry, Brindavan Campus, Sri Sathya Sai Institute of Higher Learning, Whitefield, Bangalore, India. November 25th, 2014
5. Advanced Biofuels from Biomass: Carbohydrates to Hydrocarbons. ICRISAT, Hyderabad, India. November 21st 2013.

6. Microbial Production of Biofuels and Platform Chemicals from Bioenergy Feedstocks. Center for Sustainable Energy Annual Bioenergy Symposium, Manhattan, KS, April 11th 2013.
7. Sustainable Biofuels from Biomass: Technical Challenges And Future Prospects. KSU Forum at the Philippine-American Academy of Science & Engineering (PAASE) Annual Meeting. Basic and Applied Sciences with Rural Economies in Mind: Land-grant Model at Kansas State University and Its Ability in Other Contexts. Batac City, Philippines. January 28th 2013
8. Biofuels and Platform Chemicals via Microbial Bioprocessing. Ateneo de Manila University, Quezon City, Philippines. January 27th, 2013. http://www.psm.org.ph/2013/02/23/psm-officer-hosted-us-professor/
9. DDGS and Soybean Meal Processing via Microbial Fermentation for Premium Animal Feed Products. 1st Congreso de Valor Agregado en Origen Manfredi, Cordoba, Argentina, July 18 – 20th 2012
10. Biofuels and Biochemicals via Biochemical Platform, Department of Chemistry, Sri Sathya Sai Institute of Higher Learning, Puttaparthi, India. January 17th, 2012
11. Biofuels and Animal Feed Products via Fermentation. SAAFoST Northern Branch Lecture (in collaboration with Cereal Science and Technology-South Africa), Department of Food Science, University of Pretoria, Main Campus, Hatfield, South Africa. August 4th, 2011
12. Biofuels: Status and Potential in the US. ARC-LNR, Grain Crops Institute, Potchefstroom, South Africa. August 5th, 2011
13. Biofuels and Bioproducts from Renewable Resources. Intensive Program (IP) on Sustainability and Energy, University of Graz, Graz, Austria. July 8th 2011 (via Distance)
14. Biochemical Platform for Fuels and Chemicals from Renewable Resources, Department of Chemical Engineering Seminar Series, Kansas State University. February 22nd, 2011
15. Value-Added Products from Sorghum via Enzymatic and Microbial Bioprocessing. Great Plains Sorghum Conference & 27th Biennial Sorghum Research and Utilization Conference, Mead, Nebraska, August 11-12, 2010.
16. Biofuels Production and Economics, CHE 670 Sustainability Seminar, Chemical Engineering Department, Kansas State University, July 23, 2010.
17. Kansas State University: College of Agriculture and Biofuels, Mariano Marcus State University, Batac City, Ilocos Norte, Philippines, July 14th, 2010
18. Production of Chemicals via Microbial Bioprocessing, Department of Chemical Engineering, University of Philippines, Diliman Campus, Philippines, July 16th, 2010.
19. Biofuels from Renewable Resources, College of Engineering, University of Santo Tomas, Manila, Philippines, July 18th, 2010.
20. Value-added Chemicals and Improved Animal Feed Product from Agricultural Resources: Biocatalysis and Microbial Fermentation. BIT's Inaugural Symposium on

Enzymes and Biocatalysis, Shanghai Everbright Convention and Exhibition Center, Shanghai, China, April 22 – 24, 2010

21. Ethanol production from biomass resources. Symposium on bioprocessing and sustainability. Panama City, Panama, November 30 – December 6, 2009
22. An Integrated Approach to Biorefining, Cellulosic Ethanol: Critical Constraints to Success, AACC International Annual Meeting, Baltimore, Maryland, September 13 – 16, 2009
23. Traditional Ethanol via Fermentation Production and Use, Biofuel Processes and Applications, Overland Park, Kansas City, September 10, 2009
24. Production and Use of Biogas, Biofuel Processes and Applications, Overland Park, Kansas City, September 10, 2009
25. Biofuels and Platform Chemicals from Agricultural Resources: Biocatalysis and Microbial Fermentation, Emerging Trends in Catalysis and Biocatalysis, Department of Chemistry, Sri Sathya Sai University, Puttaparthi, India, August 11 – 13th, 2009
26. Integrated Wheat-based Biorefinery: Value-added Bioproducts using Enzymes and Microbial Fermentation, International Wheat Quality Conference IV, Saskatoon, Saskatchewan, Canada, June 2-6, 2009
27. Platform chemicals from renewable resources via bioprocessing, Center for Biopolymer by Design, Kansas State University, March 5, 2009.
28. Bioprocessing: Status and Potential, Sri Sathya Sai University, Puttaparthi, India, June 7, 2008
29. Industrial Biotechnology: Recent Advances, School of Biotechnology, JNTU, Hyderabad, India, June 16, 2008
30. Industrial Biotechnology: Future Challenges and Opportunities, Rice University, Biochemical Engineering Class, Houston, TX, March 29, 2007; April 10, 2008
31. Value-Added Products from Plant Resources: Biofuels and Biochemicals. Plant Biology and Environment: Changing Scenario, University of Allahabad, Allahabad, India, December 17 – 19, 208
32. Bread or BTUs: Industrial Wheat Applications, K-State Research and Extension, ARC-Hays Fall Field Day, Fort Hays, KS, August 23, 2007
33. Bioprocessing of Cellulosic materials to high value products, MeadWestvaco Innovation Center, Rayleigh, NC, November 13, 2007
34. Cellulosic Ethanol: Status and Potential, Bioenergy and Water in Kansas, Kansas Water Office and KCARE, Garden City, KS, December 7, 2007

Collaborators

Dr. Ka-Yiu San, Department of Bioengineering, Rice University; Dr. George Bennett, Department of Biochemistry and Cell Biology, Rice University; Dr. Donghai Wang, Biological and Agricultural Engineering; Dr. Mary Rezac, Dr. Peter Pfromm, Dr. Keith Hohn, Chemical Engineering, Kansas State University; Dr. Otto Folkerts, Dr. Ramesh Nair, Chromatin, Inc; Dr. Tom Robb, Abengoa Bioenergy Inc; Dr. David Knox, MeadWestvaco; Dr. Don Coffee, MGP Ingredients, Dr. Mukund Karanjikar, Technology Holdings, Inc; Dr. K.B.Ramachandran, IIT Madras, India; Dr. R. Sai Sathish, Sri Sathya Sai Institute of Higher Learning, Puttaparthi, India;

P. Srinivas Rao, ICRISAT, Hyderabad, India.

Post-Doctoral Students/Research Assistants

Dr. Jhinuk Gupta (2012 – 2014); Dr. Krishna Bastola (2014-present); Akhila Rose Kingsly (2013 – present)

Graduate Students

Ananda K. Nanjundaswamy, PhD (2010); Achira Mukhopadhyay,MS (2009); Zhang Yixing, MS (2010); Sunil Bansal, MS(2010); Khushal Brijwani, PhD (2011); Liyan Chen, PhD (2013); Kyle Probst PhD (2010 – present); Yixing Zhang PhD (2011-present); Jonathan Wilson PhD (2011 – present); Yadhu Guragain PhD (2012 – present); JungEun Lee PhD (2013-present); Yanguang Liu MS (2013 – present)

Graduate Student Advising Committee Member

Esam Salim, MS, 2007-08, Erin Mader, MS, 2008-10, Jonathan Wilson, MS, 2009-11, Juhyun (Camila) Yoo, PhD, 2008-10, Yonghui Li, PhD, 2009-11, Anne Rigdon, PhD, 2009-2013, Tianjian Tong, MS, 2010-2012, Gustavo Correa, MS, 2008- present, Namhoon Kim, MS, 2013-present , Grain Science and Industry Department; Subramanian Sathish, PhD, 2007-2012, Rachel Opole, PhD, 2009-2012, Todd Ballard, PhD, 2009-2012, Agronomy Department; Patrick Zhang, PhD, 2010-2011, Sarah Zhang, PhD, 2012 – 2013, Meng Zhang, PhD, 2012- 2014, Industrial & Manufacturing Systems Engineering; Ling Zhang, MS, 2009-2012, Kyle Linnebur, MS, 2011 – 2013, BAE; Leslie Schulte, PhD, 2010 –2015, Quanxing Zheng, PhD, 2012-present, Fan Zeng, PhD, 2012 – present, Liz Boyer, MS, 2012 – present, Chemical Engineering Department; Namhoon Kim, MS, 2013-2014, Grain Science and Industry Department; Ke Zhang, Phd, 2012-2014, BAE; Michelle Horstmeier, PhD, 2012 – present, Sociology Department

Outside Chairperson: Karnnalin Theerarattananoon, Doctoral Committee, Biological & Agricultural Engineering Department. 2011

Visiting Scientists/Faculty

Marina Marques, Department of Biochemistry and Chemical Technology, IQ-UNESP-Brazil; Dr. Prasanna Kankanala, Core Adjunct Faculty, National University, Ontario Campus, California ; Mr. Florent Soule, ENSIACET, France (FIPSE Fellow 2012); Dr. Douglas Nkosi (Borlaug Fellow 2010-2011), Senior Scientist, Animal Production Institute, South Africa; Dr. Harinder S. Oberoi, Senior Scientist, CIPHET, India(2008-09); Saida Lavudi, Assistant Professor, School of Biotechnology, JNTU, India (December, 2009); Dr. Shirley Agrupis (Borlaug Fellow 2009-10; Fulbright Fellow 2011-12), Associate Professor, Mariano Marcos State University, Philippines;

Undergraduate Research Students

David Murphy, Nathan McGraw, Biochemistry; Jonathan Wilson, Patrick Mader, Kyle Deutscher, Zachary Lee, Grain Science and Industry; Emily Coon, Blake Wilson, Mechanical Engineering; Reggeany Barrios, Vamsi Bhadriraju, Chemical Engineering; Josh Hughes, Brittany Lanning, Life

Sciences; NSF REU Program: Karen Snook, Kara Walker, Bethany Vosburgh, Evan Davis, Tyler Touchstone, Alisha Multer, Akeem Obe, Chelsea Connec, Christian Kehr, Garrett Meier; Amanda Chura; Roger Cochrane; Amanda DiBiasio, Erika Demel

Undergraduate Student Advisement

Graham Nelson, Kyle Deutscher; Nichole Bryant; Grace Bokelman; Tessa Jones; Matthew Bentley; Colby Brownrigg; Robert Rash; Bethany Ericson, Ryan Coffman, Abigail Harrison; Zachary Lee; Ira Parsons; Ted Reimer; Cole Rickabaugh.

Current Teaching

GRSC 745: Fundamentals in Bioprocessing. Offered in spring and fall semesters for senior and graduate students; GRSC 905: Enzyme and Bioprocessing Applications. Offered in even fall semester for graduate students; GRSC 630 Management Applications in Grain Processing Industries. Offered for senior UG students in Fall semesters; CHE 715: Biochemical Engineering. Offered in spring semesters for regular and distance students; GRSC 101 Introduction to Grain Science and Industry (ethanol and biodiesel topics); and CHE 802: Sustainable Bioenergy Seminar.

Completed Research Projects

1. Demonstrate pelletizing forage crops and perennial grasses in the field to increase cellulosic ethanol production. $690,000. DOE-USDA Biomass Research and Development Initiative. 2008-2012. PI Scott Staggenborg. Co-PIs: Vadlani PV, Wang D, McKinney L
2. Novel Process for Biomass Conversion to Butylenes. $150,000. US Department of Defense SBIR Phase I. PI Vadlani Hohn K
3. Establishment and Operations of Kansas Bio-Plastics Commercialization Collaborative. $22,000. US Small Business Administration, 2011-2012 Kansas State University Subcontract: PI Vadlani PV
4. Aerobic Stabilization of Silage. $24,889. USDA-FAS Fellowship to host Borlaug Fellow from South Africa. 2010-2011. PI Vadlani PV
5. Improved Ethanol Production from Cellulosic Biomass: Enhanced Enzymatic Digestion and Fermentation from Inhibitor-free Hydrolysis. $49,372. Graduate Assistantship Award, Center for Sustainable Energy, KSU. Aug 2008- July 2010. PI Vadlani PV
6. Nutritional enhancement of soybean carbohydrates and hulls for animal feed using microbial cultures. $77,519. Kansas Soybean Commission. 2009-2011 PI Vadlani PV, Co-PIs Madl RL, O'Brien D.
7. Biomass conversion to biofuels. $24,981. USDA-FAS Fellowship to host a Borlaug Fellow from the Philippines. 2009-2010. PI Vadlani PV, Co-PIs Madl RL, Staggenborg, S.
8. Innovative Bioprocessing of lignocellulosic biomass to high value products. $97,000. MeadWestvaco, Inc. 2007-2009. PI Vadlani PV

9. Screening sorghum germplasm for abiotic stress tolerance and biofuel production. $66,000. Kansas Sorghum Commission. 2008-2010. PI Prasad PVV. Co-PIs: Vadlani PV, Roozeboom C.
10. Rice Bran as a Nutrient Source to Enhance Ethanol Fermentation Efficiency: Feasibility Studies. $15,779. Nutracea, Inc. 2008. PI Vadlani PV
11. Improving Grain-based ethanol process efficiency and physical and nutritional properties of DDGS. $36,000. KSU College of Agriculture MiniGrant program. 2007-2008. PI Behnke K Co-PIs: Vadlani PV, Madl RL, Lamsal B
12. Protein content enhancement of DG: microbial adaptation and pilot plant studies. Abengoa Inc., 2006 – 2007 ($100,000). PI Vadlani PV, Madl R
13. Biobutanol production from corn grain: feasibility of using existing ethanol plant facilities. A proprietary project with a chemical company, 2007 ($100,740). Co-PI with Peter Pfromm (PI), Richard G Nelson, Ronald L Madl and Vincent Amanor-Boadu (Co-PIs).
14. Protein content enhancement of DG: bioconversion of fiber into single-cell-protein. Value-added project using co-products from the bio-ethanol industry, a proprietary collaborative project with a large bio-energy Industry, 2005 – 2006 ($143,000). Co-PI with Ron Madl, Co-PI, BIVAP.
15. Non-corrosive propionate based road deicer, USDA SBIR Phase II, 2002 -2005 ($300,000).
16. Innovative and low-cost process to produce isoamyl acetate using metabolically engineered E.coli, USDA SBIR Phase I, 2004 – 2005 ($80,000). PI with Rice University subcontract.
