

# WHY SANITATION IS IMPORTANT FOR HEAT TREATMENTS TO BE SUCCESSFUL

RONALD J GRINHAM

FOR

- WORLD WIDE ALTERNATIVE PEST  
ELIMINATION SERVICES INC.

# Introduction

- A SUCCESSFUL SANITATION PROGRAM REQUIRES DEDICATION.
- THERMAL HEAT TREATMENTS AND IMPROVED SANITATION CAN REPLACE THE NEED TO FUMIGATE WITH TOXIC GASES.

# WHO IS RESPONSIBLE ?

A SUCCESSFUL SANITATION PROGRAM REQUIRES THE ACCEPTANCE AND INVOLVEMENT OF EVERY STAFF MEMBER.

# WHO IS RESPONSIBLE ?

THE RESPONSIBILITY RESTS ON  
THE SHOULDERS OF EVERY  
EMPLOYEE FROM SENIOR  
MANAGEMENT TO JANITORIAL  
STAFF.

# THE TARGET

- WHERE DOES THE INSECT POPULATION RESIDE ?

# THE INSPECTION

- CRACKS AND CREVICICES
- CAVITIES
- FORGOTTEN AREAS
- OLD STOCK
- DISCARDED MACHINERY
- STAFF LOCKERS
- RODENT BAIT STATIONS

# TOOLS

- PHEROMONE AND KAIROMONE TRAPS ARE IMPORTANT TOOLS IN A SANITATION PROGRAM.
- PHEROMONES AND KAIROMONES CAN BE USED TO PIN POINT AN ACTIVE INFESTATION THIS ENABLES YOU TO CARRY OUT A THERMAL HEAT TREATMENT TO THE INFECTED AREA AND NOT WAIT FOR THE NORMAL ANNUAL FUMIGATION TO TAKE PLACE.

# THE POINT OF SERVICE

- TAKE THE TREATMENT TO THE SOURCE OF INFECTION.

# THE BIG PICTURE

- WHY DO WE FUMIGATE?
- TO ELIMINATE AN INSECT INFESTATION.

# CONTINUING PROBLEMS ?

- HOW DID THE  
INFESTATION OCCUR?

# 4 GOOD REASONS WHY

- INTRODUCED INCOMING RAW MATERIAL.
- REJECTED OR RETURNED STOCK.
- A NEIGHBORING FACILITY.
  - OR
- A RESULT OF POOR SANITATION.

# IS THERE AN ANSWER ?

- MONITOR INCOMING RAW PRODUCT.
- STOCK ROTATION.
- AN ISOLATED MORGUE AREA.
- REFRIGERATED TRAILERS TO STORE POSSIBLE INFECTED RETURNS OR STOCK.

# HOW CAN WE OVERCOME THIS PROBLEM?

- EMPLOY A PRIVATE CONSULTANT TO EVALUATE YOUR CURRENT SANITATION AND / OR HYGIENE PROGRAM AND ITS EFFECTIVENESS.

# NOW WHAT ?

- USE THAT INFORMATION, IT MAY NOT BE WHAT YOU WANTED TO HEAR.

“ BUT ”

- TAKE IMMEDIATE STEPS TO IDENTIFY AND CORRECT THE CONSULTANTS FINDINGS.

# THE FINAL SOLUTION.

- PROGRAM REGULAR ONGOING INSPECTIONS.

# WHAT DO I LOOK FOR WHEN CREATING A SUCCESSFUL SANITATION PROGRAM ?

START WITH THAT RETURNED  
STOCK THAT MAY HAVE  
FOUND ITS WAY TO A FAR  
CORNER.

# WHAT DO I LOOK FOR WHEN CREATING A SUCCESSFUL SANITATION PROGRAM ?

- THOSE FORGOTTEN AREAS,  
EVERY FACILITY HAS THEM,  
WE ALL KNOW THEM, THOSE  
ARE THE AREAS WE WILL LOOK  
AT NEXT WEEK OR MAYBE  
THE WEEK AFTER!

# LOOK FOR THE UNUSUAL

## EXAMPLE:

- SOME SILOS HAVE PORT HOLES OR INSPECTION PLATES THAT HAVE CAVITIES. THIS CONCEALED AREA ALLOWS PRODUCT TO BECOME TRAPPED INVITING INSECT INFESTATION.

# KEEP LOOKING

- GO TO THE ROOF TOP AND LOOK DOWN.
- THOSE DARK AND MYSTERIOUS CORNERS.
- LOOSE FLAKING PAINT, CONCRETE CRACKS OR WALL COVERINGS.

# A WINNER

- SANITATION AND THERMAL HEAT ARE A WINNING COMBINATION BUT IT TAKES YOUR DEDICATION TO CREATE THAT SUCCESS.
